

PT. NADESCO INDONESIA

ABOUT US

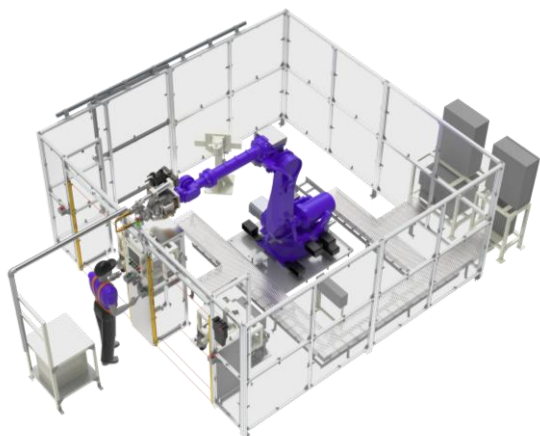

Nadescos Indonesia is a member of NADEX Group (www.nadex.co.jp), is a machinery integrator and specialized machine manufacturer. We bring ideas to life through advanced machinery integration and custom-made solutions tailored to customer specifications. Our product lineup includes a wide range of equipment such as laser marking systems, laser cutting machines, camera-based inspection systems, cutting and press machines, leak testers, and traceability systems. With strong commitment to innovation, precision, and customer satisfaction, we help industries achieve higher efficiency, reliability, productivity, profitability, and sustainable growth.

Explore Our Range of Products & Services

Discover our diverse portfolio, featuring advanced special-purpose machines, automation solutions, and custom-engineered systems — all designed to enhance efficiency and performance across industries.

OUR PRODUCT

Robot System

Specializing in robotics and automation, we design and integrate intelligent systems that deliver innovation, flexibility, and precision to modern manufacturing and industrial applications.

Robot portfolio includes :

- Welding / Cutting / Deburring
- Camera-based Inspection
- Packaging & Palletizing
- Handling / Pick and Place
- Mounting / Collaborative
- Painting

Automatic Greasing Machine

Our Grease Pump Machines are designed to provide reliable, efficient, and precise lubrication solutions for industrial applications. With durable construction and advanced engineering, they ensure a consistent grease supply, minimize maintenance downtime, and extend equipment lifespan.

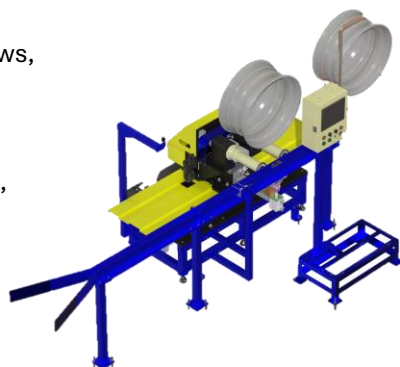

Material Handling Machine

Material handling solutions designed to streamline production workflows, reduce manual handling, and improve operational efficiency.

Material Handling Solutions:

Conveyor Systems, Pick & Place Systems, Automatic Transfer Systems, Custom Material Handling Machines, and more.

OUR STRENGTH

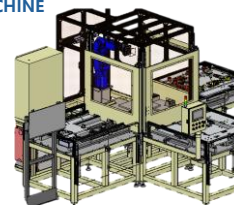

Automatic Laser Machine

Experience the future of precision manufacturing with our advanced laser machines. Engineered for speed, accuracy and efficiency, they deliver superior performance in marking, welding, and cutting, and can be seamlessly integrated with other systems such as conveyors and inspection equipment

Automatic Inspection Machine

WELDING INSPECTION MACHINE

CONVEYOR TRANSFER & WEIGHT CHECKER MC

Our Inspection Machines are specially designed for the automotive, pharmaceutical, food & beverage, and electronics industries to ensure consistent product quality. Equipped with advanced vision technology, it provides highly accurate defect detection, dimensional measurement, and component verification.

Automatic Press Machine

Our Automatic Press Machines deliver stable performance in forming, stamping, and assembly processes. Equipped with advanced control technology, it ensures smooth operation, consistent output, and long-term reliability in industrial production.

- High pressing force with accuracy
- Flexible for various applications
- Durable structure for continuous operation
- Hybrid press

Automatic Cutting Machine

Designed to meet diverse cutting demands with outstanding speed, accuracy, and consistency. Equipped with intelligent NC control technology, it ensures clean and precise results across a wide variety of materials.

STEEL CUTTING MACHINE

WOOD CUTTING MACHINE

Automatic Assembly Machine

Engineered to deliver efficient, precise, and reliable assembly processes. Featuring intelligent control systems and a durable structure, it ensures accurate part alignment and consistent product quality throughout every production cycle.

SCREW TIGHTENING MACHINE

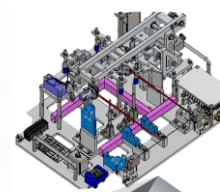

Jig Design & Manufacturing

Our Featured Jig Portfolio:

Assembly Jigs, Inspection Jigs, Press Jigs, Welding Jigs, Tightening Jigs, Leak Test Jigs, Functional Test Jigs, and Sealant Jigs.

INNER LENS ASSY TIGHTENING JIG

JIG LEAK TEST

PT. NADESCO INDONESIA

ABOUT US

Nadesco Indonesia merupakan bagian dari **NADEX Group** (www.nadex.co.jp), perusahaan integrator mesin sekaligus produsen mesin khusus. Kami mewujudkan ide menjadi kenyataan melalui integrasi mesin berteknologi tinggi dan solusi yang disesuaikan dengan kebutuhan pelanggan. Rangkaian produk kami meliputi laser marking systems, laser cutting machines, camera-based inspection systems, cutting and press machines, leak testers, material handling system dan traceability systems. Dengan komitmen terhadap inovasi, presisi, dan kepuasan pelanggan, kami mendukung berbagai industri untuk meningkatkan efisiensi, keandalan, produktivitas, profitabilitas, serta pertumbuhan yang berkelanjutan.

Produk dan layanan kami

Temukan portofolio kami yang beragam, mencakup mesin khusus berteknologi tinggi, solusi otomasi, dan sistem rekayasa khusus — semuanya dirancang untuk meningkatkan efisiensi dan kinerja di berbagai industri.

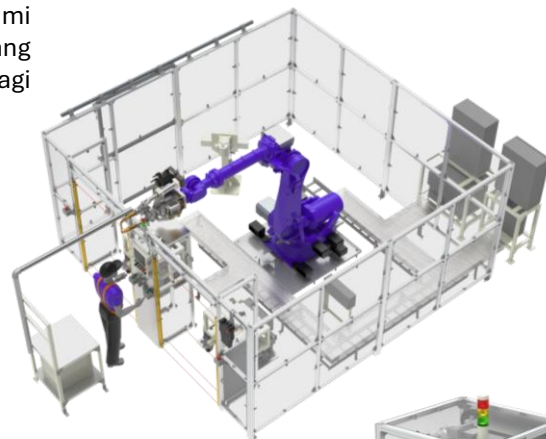

OUR PRODUCT

Robot System

Dengan keahlian di bidang robotika dan otomasi, kami merancang serta mengintegrasikan sistem cerdas yang menghadirkan inovasi, fleksibilitas, dan presisi bagi manufaktur modern serta berbagai aplikasi industri.

Portofolio Robot Unggulan kami :

- Welding / Cutting / Deburring
- Camera-based Inspection
- Packaging and Palletizing
- Handling / Pick and Place
- Mounting / Collaborative
- Painting

ROBOT SYSTEM

Automatic Greasing Machine

Grease mesin (grease pump) kami dirancang untuk memberikan solusi pelumasan yang handal, efisien, dan presisi bagi berbagai aplikasi industri. Dengan konstruksi yang kokoh dan rekayasa canggih, mesin ini memastikan pasokan pelumas mesin (gemuk) yang konsisten, meminimalkan waktu henti perawatan, serta memperpanjang usia pakai peralatan.

GREASING MACHINE

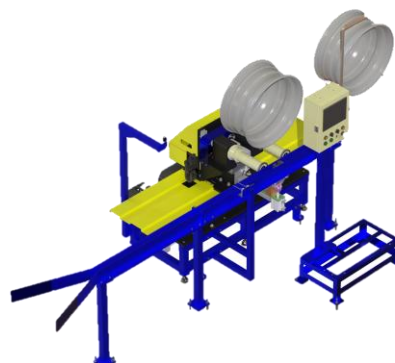

Material Handling Machine

Solusi material handling yang dirancang untuk memperlancar alur produksi, mengurangi proses manual, dan meningkatkan efisiensi operasional.

Material Handling Solutions :

Conveyor System, Pick & Place System, Automatic Transfer System, Custom Material Handling Machine, etc

ROTARY HANGER MACHINE

OUR STRENGTH

Automatic Laser Machine

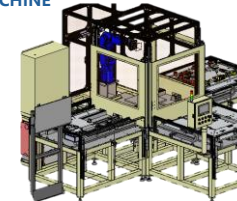

Inovasikan manufaktur presisi masa depan melalui mesin laser canggih. Dirancang untuk kecepatan, ketelitian, dan efisiensi, mesin ini memberikan performa unggul dalam proses laser, pengelasan, dan pemotongan, serta dapat diintegrasikan secara mudah dengan sistem lain seperti konveyor dan peralatan inspeksi lainnya.

Automatic Inspection Machine

Mesin Inspeksi kami dirancang khusus untuk industri otomotif, farmasi, makanan & minuman, serta elektronik guna memastikan kualitas produk yang konsisten. Dilengkapi teknologi visi canggih, mesin ini mampu mendeteksi cacat dengan akurasi tinggi, melakukan pengukuran dimensi, serta verifikasi komponen secara presisi.

WELDING INSPECTION MACHINE

CONVEYOR TRANSFER & WEIGHT CHECKER MC

Automatic Cutting Machine

Dirancang untuk memenuhi berbagai kebutuhan pemotongan/cutting dengan kecepatan, ketelitian, dan konsistensi yang luar biasa. Dilengkapi teknologi kontrol NC cerdas, mesin ini memastikan hasil potongan/cutting yang bersih dan presisi pada berbagai jenis material.

STEEL CUTTING MACHINE

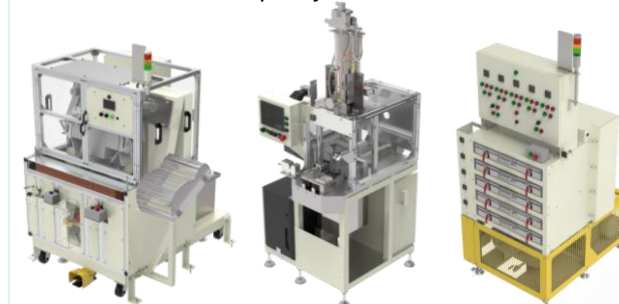

WOOD CUTTING MACHINE

Automatic Press Machine

Mesin Press Otomatis kami menghadirkan kinerja stabil dalam proses pembentukan, pengepresan, dan perakitan. Dilengkapi teknologi kontrol canggih, mesin ini menjamin pengoperasian yang mulus, hasil yang konsisten, serta keandalan jangka panjang dalam produksi industri.

- Keunggulan :
- Gaya tekan tinggi dengan presisi
 - Fleksibel untuk berbagai aplikasi
 - Struktur kokoh untuk operasi berkesinambungan
 - Tersedia dalam tipe Hybrid Press

Automatic Assembly Machine

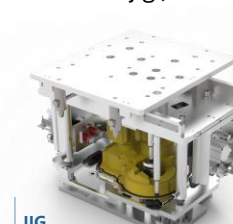

Dirancang untuk menghadirkan proses perakitan yang efisien, presisi, dan handal. Dengan sistem kontrol cerdas dan struktur yang kokoh, mesin ini memastikan keselarasan komponen yang akurat serta kualitas produk yang konsisten di setiap siklus produksi.

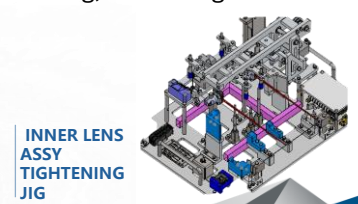

SCREW TIGHTENING MACHINE

Jig Design & Manufacturing

Portofolio Jig Unggulan kami : assembly Jig, inspection jig, Press Jig, Welding Jig, tightening Jig, leak test jig, functional test Jig, sealant jig.

JIG LEAK TEST
